

We are paid subscribers to XM Radio. We purchase the service because we chose to listen to what is offered. This country is based on freedom of speech...so shouldn't XM Radio be allowed to broadcast the type of stations it wants to? Our economy is based on free trade and competition. Don't take away competition...you are monopolizing an industry. The XM Radio service provides me and my friends (who are also subscribers) with a huge variety of music, entertainment, and information not available on basic radio. Since I pay for this service, I should be permitted to hear all the stations XM chooses to broadcast. Please reject NAB's petition 04-160 and allow XM Radio to continue the great quality and service I enjoy.
